

DR. DOUGLAS FRANK
Sunday, November 12, at 12 Noon
Chez Nous Cafe
2159 Roosevelt Ave, Redwood City

Restoring Integrity to America's Voting System

Dr. Douglas G. Frank is a 40-year modeler of pandemics and elections, a renowned scientist/inventor who received his PhD in Electrochemistry at UC Santa Barbara.

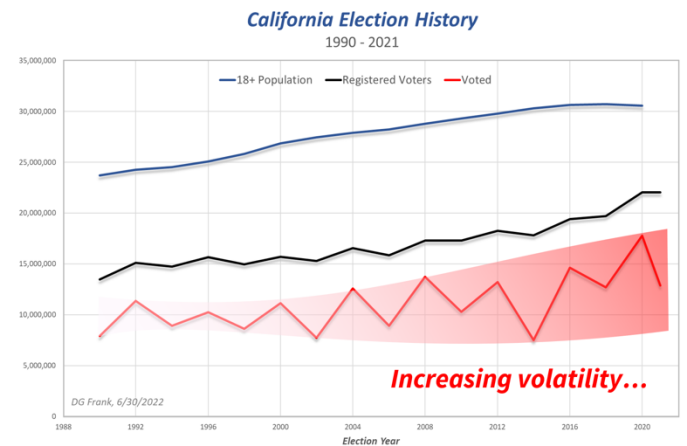

He will share his background and how it led him to **research and prove there is indeed election fraud that is purposely used to manipulate results**, first at the state level and then replicated at the respective county/precinct levels.

Four questions he'll answer:

- How algorithms are used to offset voter registration rolls through the "Vote By Mail" (VBM) system in order to produce projected win margins.
- How these algorithms can not only project and manipulate results but how they are used locally, state, and nationwide.

- Where these voter registrations come from, how and where they are stored and used as necessary to ensure desired results.
- How we as citizens can actively become part of the solution in reversing the corruption of our election system.

DISCLOSURE: Dr. Frank receives no compensation for his appearances.

There will be an offering taken to help offset travel expenses incurred by Dr. Frank to appear and speak.
